

PRE- EVENT DETAILS

2024-25

Event Name: Math Visionaries

Name of the Forum: Mathematics Association of Podar

Date: 29th July, 2024

Time: 12pm - 2pm

Venue: F2, First Floor, R.A. Podar College of Commerce and Economics

Description:

The Math Visionaries event is a groundbreaking initiative designed to provide visually impaired students with an engaging and supportive environment to explore the wonders of mathematics. As part of the Mathematrix fest, this event aims to break down barriers and showcase the adaptability of mathematical concepts through innovative and accessible activities. This event is in collaboration with the Inclusive Cell of our college.

Students will have the opportunity to participate in tactile math exercises, treasure hunt and relying on other senses like hearing and feeling. This will ensure that every activity is both enjoyable and educational.

By focusing on inclusivity and creativity, the Math Visionaries event aspires to empower visually impaired students, enhancing their understanding and appreciation of mathematics. This initiative not only aims to boost their confidence in tackling mathematical challenges but also to foster a sense of community and belonging. Through this event, we hope to inspire these students to pursue further studies and careers in mathematics, demonstrating that math can be an exciting and integral part of their lives.
